# Performance Based Acquisition Services

Leverage the value of Performance Based Acquisition (PBA) with Federal Services' defined PBA Methodology:

- Reduce development time and effort for the Statement of Objectives (SOO), Performance Work Statement (PWS), Performance Requirements Summary (PRS) and Quality Assurance Surveillance Plan (QASP);
- Reduce the number of questions from vendors regarding the RFP; and
- Facilitate evaluation of proposals.

**Fulfill your mission requirements in reduced time with minimal resources.**

## Help is available now!

You save time and effort in developing your PBA packages or converting your traditional acquisition packages to PBA.

Our methodology ties the Statements of Objectives (SOO), Performance Work Statements (PWS), Performance Requirements Summaries (PRS) and Quality Assurance Surveillance Plans (QASP) together using the equivalent of a requirements traceability process.

In addition to the SOO, PWS, PRS and QASP, the process includes Performance Work Breakdown; Section L, Proposal Instructions linkage; Section M, Evaluation Factors linkage; and source selection planning. Although it is an end-to-end methodology, you can enter at any point to take advantage of work completed to date.

We can use our templates or yours. We create the clear writing to convey the required information from your source material and interviews with your subject matter experts while you perform your mission critical activities. Our methodology results in compliance with FAR Subpart 37.6, Performance Based Acquisition

## Convert your requirements to PBA documents

PWS, SOO, QASP and PRS—We provide all or any combination to help you meet your schedule and fulfill your requirements.

**You execute mission critical activities.  
We develop the documentation.**
